

Occupational Safety & Health Services

Packer Environmental Consultants (PEC) offers a broad range of occupational safety and health services. Our mission is to help clients reach their safety and health goals and objectives. Whether the goal is to ensure regulatory compliance, conform to a national or international safety and health management system, reduce costs or improve safety performance, PEC can help define, target, and implement solutions. We understand each company is unique and has specific needs and challenges. Our approach is to focus on each client's needs to ensure we provide value-adding ideas and services to their safety and health process.

Safety Management Systems

More businesses are turning to safety management systems to manage their risks and achieve their business goals. Understanding and implementing elements in management systems such as ANSI Z10, the OSHA Voluntary Protection Program (VPP), or the American Chemistry Council's Responsible Care Program can be challenging. PEC provides services in developing, implementing, auditing, and assessing management systems, identifying strengths and weaknesses, and recommending specific action plans.

Our services include:

- Gap analysis
- Program development
- Auditing and performance measurement
- Continuous improvement

Occupational Safety & Health Services

Regulatory Compliance and Assistance

PEC helps clients take the necessary steps to achieve, maintain or exceed compliance with Federal and State Occupational Safety and Health Administration (OSHA) regulations. PEC provides expertise in occupational safety and health compliance concerns for general industry and construction including OSHA and ANSI safety and health standards. We answer your questions and support your regulatory needs with our experienced, professional staff. Services offered in regulatory compliance for general industry and construction include:

- Chemical safety
- Lockout tagout
- Machine guarding
- Confined space entry
- Blood-borne pathogens
- Respiratory protection
- Fall protection
- Equipment and tools
- Emergency action plans
- Fire prevention plans
- Electrical safety
- Process safety management
- Powered industrial trucks
- Personal protective equipment

Risk Control and Loss Prevention

PEC provides risk control and loss prevention services to insurance brokers, insurance carriers, claims adjusters, third party administrators (TPAs), and their clients and policyholders. These services include identifying and quantifying risks, developing risk control and loss prevention strategies, and assisting with claims resolution for the commercial casualty and property insurance industry. Workers' compensation, automobile liability, general liability, products liability, environmental liability, and property are some of the lines of insurance coverage that we often assist in improving the quality of risk and lowering costs.

- Underwriting surveys
- Risk/loss control surveys
- Risk improvement services
- Program assessment and development
- Accident/incident analysis and investigation
